Quality Statement

Skyworks is deeply committed to providing our customers with high-quality products and keeping their satisfaction and success at the core of our business systems. Our comprehensive quality management organization is integrated across the entire company — from the product development cycle to manufacturing operations and post-sales services – emphasizing sustainable, continuous improvement at every level. Achieving IATF 16949 automotive certification demonstrates our commitment to meeting our customers' compliance expectations, while aligning with unique automotive requirements after undergoing a thorough audit process. Learn more at skyworksinc.com/Quality.

Skyworks employs a hybrid manufacturing approach, vertically integrating for competitive advantages with strategic alliances for leading-edge capabilities. This model effectively balances our capacity with market demands while maintaining high internal utilization.

We partner with our suppliers by aligning quality objectives, targets, and controls, while strategically sharing knowledge. Integrated tools allow efficient access to product and process documentation and enable continuous analysis of quality, delivery, and customer impact data.

Skyworks' Quality Management System

Our customer-focused, comprehensive business system aims to implement improvement strategies, fosters data-driven management decisions and integrates our suppliers as partners.

Quality Policy

At Skwyorks, we are committed to aspiring toward the never-ending quest for:

✅ No Field Failures   ✅ No Reliability Failures   ✅ No Customer Returns   ✅ No Yield Loss
