

Skyworks Solutions, Inc.

Conflict Minerals Report

For the Calendar Year Ended December 31, 2024

Background

This report for the year ended December 31, 2024, is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the “Conflict Minerals Rule”). The Conflict Minerals Rule imposes certain due diligence and disclosure requirements on companies that file public reports with the Securities and Exchange Commission (the “SEC”) and whose manufactured products contain conflict minerals that are necessary to the functionality or production of the products. Conflict minerals are defined as cassiterite, columbite-tantalite (coltan), gold, wolframite, and their derivatives, which are limited to tin, tantalum, and tungsten (“3TG”). These requirements apply to reporting companies whatever the geographic origin of the conflict minerals and whether or not such conflict minerals financed or benefitted armed groups.

If a reporting company has reason to believe that any of the conflict minerals in the registrant’s supply chain may have originated in the Democratic Republic of the Congo or an adjoining country (the “Covered Countries”) (or if the registrant is unable to determine the country of origin of those conflict minerals) and did not originate from recycled or scrap sources, then the issuer must exercise due diligence on the conflict minerals’ source and chain of custody. The registrant must submit a Conflict Minerals Report (the “CMR” or the “Report”) to the SEC that includes a description of those due diligence measures.

Company and Product Overview

Skyworks Solutions, Inc. (herein referred to as “Skyworks,” the “Company,” “we,” “us,” or “our”), is a leading developer, manufacturer and provider of analog and mixed-signal semiconductor products and solutions for numerous applications, including aerospace, automotive, broadband, cellular infrastructure, connected home, defense, entertainment and gaming, industrial, medical, smartphone, tablet, and wearables. For a further discussion of our products, see our Annual Report on Form 10-K for the fiscal year ended September 27, 2024. The information contained in our Form 10-K is not incorporated by reference into, or a part of, this Report.

We conducted an analysis of our products, including both products that we manufacture and products that we contract for manufacture, and found that substantially all of these products, including our analog and mixed-signal semiconductor products, contain components considered likely to contain 3TG. As a member of the Responsible Minerals Initiative (“RMI”) (RMI member I.D. SWKS), we utilize the Conflict Minerals Reporting Template (“CMRT”) to survey our supply chain and identify the smelters / refiners in our supply

chain. As part of our supplier survey process, we identify materials sourcing locations (countries of origin) using resources available to RMI members. Based on the information obtained through our supply chain survey regarding activities of our suppliers whose materials or components contain 3TG, Skyworks has concluded that certain of our products contain 3TG that originated, or may have originated, in the Covered Countries and that is not from recycled or scrap sources.

Skyworks believes our reasonable country of origin inquiry and process was reasonably designed and performed in good faith. We publicly communicate our Responsible Minerals Sourcing Policy via our website at www.skyworksinc.com. The content of any website referred to in this Report is included for general information only and is not incorporated by reference in this Report. We also maintain a grievance reporting system that allows employees, suppliers, and other stakeholders to report anonymously any issues pertaining to the use of conflict minerals in our products.

This CMR describes the due diligence we have performed with respect to the source and chain of custody of our conflict minerals.

Design of Due Diligence Measures Taken

Skyworks has designed its due diligence measures to be in conformity, in all material respects, with the internationally recognized due diligence framework in the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Third Edition, including regarding the establishment of strong company management systems, identification and assessment of risks in the supply chain, design and implementation of a strategy to respond to identified risks, independent third-party audits of smelter / refiner due diligence practices, and annual reporting on supply chain due diligence.

Due Diligence Performed by Skyworks

Skyworks relies on its suppliers to provide information on the origin of the 3TG minerals. Skyworks' due diligence measures undertaken in calendar year 2024 included, but were not limited to, comparing all smelters / refiners identified via the supply chain survey against the lists of smelters / refiners designated as conformant to the RMI's Responsible Minerals Assurance Process ("RMAP"), the London Bullion Market Association ("LBMA") Good Delivery List, or the Responsible Jewellery Council ("RJC") Chain of Custody ("CofC") Program (all recognized third-party processes).

Skyworks identified 59 in-scope suppliers providing us with 3TG or products containing 3TG that were used in Skyworks' finished good devices for sale. Skyworks confirmed that 100% of identified suppliers provided disclosures of smelters / refiners in their respective supply chains. These disclosures from each supplier indicated that all smelters / refiners were identified and reported to Skyworks. Further, Skyworks

confirmed via the due diligence process described above that all smelters / refiners reported were evaluated and recognized as conformant to the RMAP, LBMA Good Delivery List, and/or the RJC CofC Program.

Results for Calendar Year 2024

As disclosed above, we had a 100% 3TG supplier response rate, and our data results indicated our smelter / refiner supply chain from those respondents was 100% conformant as of December 31, 2024. The facilities the Company believes to be used to process the Company's necessary conflict minerals include the smelters / refiners listed in Annex A. Countries of origin, to the best of our knowledge, are listed in Annex B.

In light of our position in the supply chain, our due diligence measures can provide only reasonable, not absolute, assurance regarding the source and chain of custody of the necessary conflict minerals in our products. We rely on our direct suppliers to provide us with information in this regard, and those suppliers, in turn, generally must seek similar information from within their supply chains to identify the original sources of the necessary conflict minerals. We also rely, to a significant extent, on information collected and provided by independent third-party audit programs. Such sources of information may yield inaccurate or incomplete information and may be subject to fraud.

To mitigate the risk that the conflict minerals in our products could benefit armed groups in the Covered Countries, we intend to continue our membership in the RMI, continue to encourage suppliers to maintain a 100% conformant supply chain (smelters / refiners conformant to the RMI RMAP, LBMA Good Delivery List, and/or the RJC CofC Program), work with relevant suppliers to update their conflict minerals reporting template using the latest CMRT, and continue to refine our conflict minerals program to improve our reasonable due diligence measures in our efforts to determine the source and chain of custody of conflict minerals.

Annex A

Subject Mineral	Smelter or Refiner Name	Country of Smelter or Refiner
Tantalum	AMG Brasil	BRAZIL
Tantalum	D Block Metals, LLC	UNITED STATES OF AMERICA
